Service Letter #14
Subject: Modification of Rudder Trim Tab Hinges
Models & Serial Numbers Affected:

M-4, S/N 3 thru 94
M-4C, S/N 1C thru 10C
M-4S, S/N 1S thru 3S
M-4T, S/N 1T thru 3T
M-4-210, S/N 1001 thru 1045
M-4-210C, S/N 1001C thru 1064C
M-4-220S, S/N 2001S
M-4-220C, S/N 2001C thru 2006C

Dear Customer:

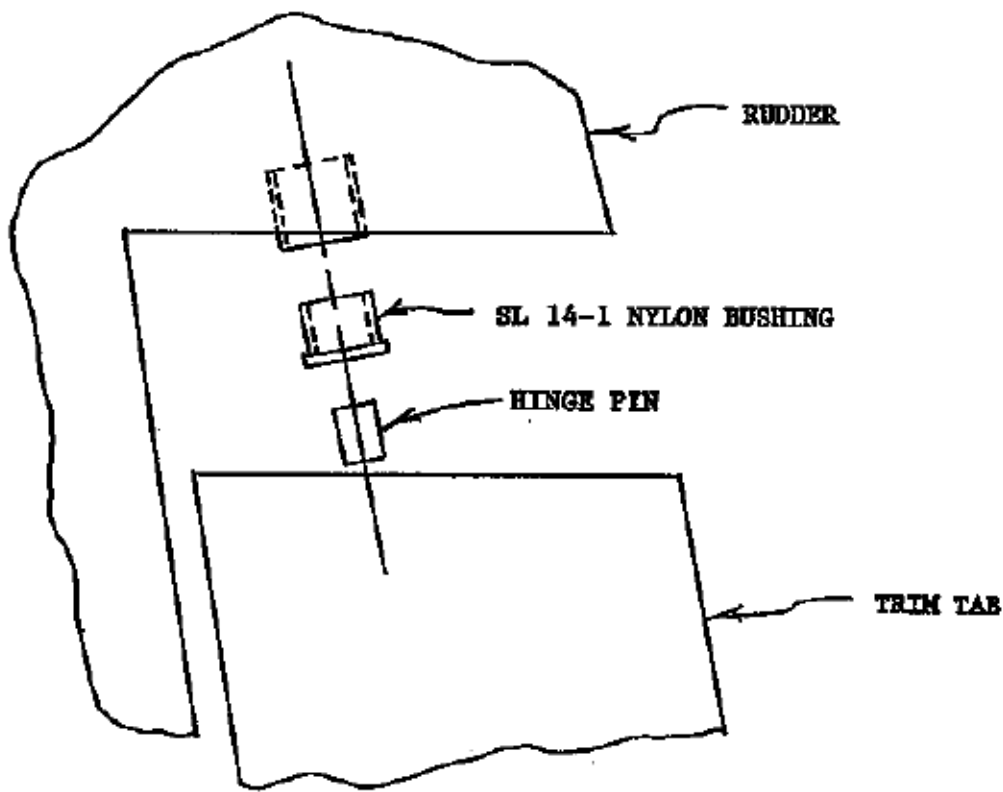

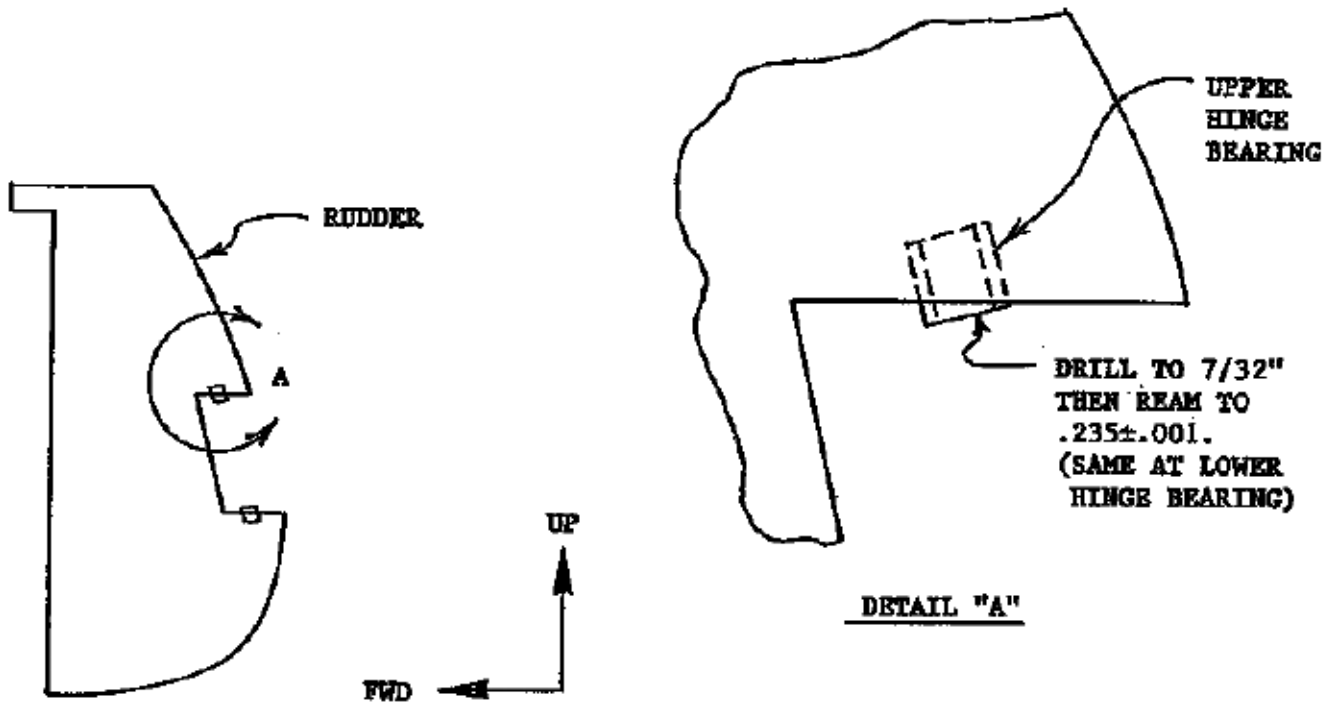

There have been instances of the rudder trim tab hinges corroding and seizing due to lack of adequate lubrication. To preclude such a condition, modify the hinge assemblies as detailed below and as shown on the attached sketch:

1. Remove the rudder trim tab from the airplane by removing screws from:
 - (a) The upper hinge pin block for aircraft with metal skin trim tabs, or
 - (b) Lower hinge pin block for aircraft with fabric tab.
2. Drill both upper and lower tab hinge bearings (on rudder frame) to $7/32"$. Then ream out to $.235" \pm .001$, carefully maintaining the hinge line alignment. See Detail A.
3. Install the nylon bearings (Part Number SL 14-1) by pressing them into the reamed bearings.
4. Clean and lubricate the trim tab hinge pins.
5. Install the trim tab to the rudder in reverse order of Instruction #1. Adjust trim tab for full travel of 52° left and 52° right $\pm 4^\circ$.
6. Complete the enclosed Service Letter Compliance Card and mail it to the Maule Aircraft Corporation:
